“SUS yields a single number representing a composite measure of the overall usability of the system being studied. Note that scores for individual items are not meaningful on their own.

To calculate the SUS score, first sum the score contributions from each item. Each item's score contribution will range from 0 to 4” (see table above). “Multiply the sum of the scores by 2.5 to obtain the overall value of SUS.

SUS scores have a range of 0 to 100.” (p.5)
