User-Centred Design

Uploading Video to Canvas

Video

*1 Choose the 'Text Entry' Tab (**NOT** Echo360 Homework Embed)*

9.1 CORE - Usability Evaluation Reflection (QUALITY POINTS)

Due No due date   **Points** 4   **Submitting** a text entry box or a file upload

In previous usability testing iterations you have used rapid evaluation techniques for the purpose of improving the interface (formative evaluation). In this task you will conduct a summative usability evaluation using more formal and controlled methodology. This will enable you to collect more accurate task completion rates and times.

3 Upload your video

If you already have your video in Echo360 then select 'Choose from My Home' .

If you haven't already uploaded your video to Echo360 then select 'Upload Existing Media' and follow the instructions

At the end of the process you should have a video file embedded in the text box that looks just like the way it is done with the lecture videos. **You can also now add text to this box for your usability evaluation events.** Make sure the time on the embedded video matches the time in your description.

It may take some time for the videos to be processed and appear properly on your submission (e.g., an hour or two depending on their size).
